The [FT5216](#) touch controller has reached end of life and is being replaced by [FT5426](#) for future production. The new controller has proven to be backwards compatible with existing systems based on internal testing.

Values such as Chip ID, Firmware ID, etc. have been updated as a result of this IC change. The new values can be found in the display datasheet.

The Touch Panel's FPC has also been redesigned to make it less susceptible to tearing and other damage from handling or assembly.

We understand that each project is unique and therefore recommend you evaluate new samples for validation.
