

N Male to TNC Female Adapter

RF Adapters Technical Data Sheet

PE91537

Configuration

- N Male Connector 1

• TNC Female Connector 2

Features

- Max VSWR of 1.15:1 up to 18 GHz
- 4 µin. Minimum contact plating

- 50 Ohm
- Straight Body Geometry

Gold over Nickel Plated Beryllium Copper Contact

Applications

- Allows Connection Between Series
- General Purpose Test

Description

Pasternack's PE91537 type N male to TNC female adapter is part of our full line of RF components available for same-day shipping. Our type N to TNC adapter has a male to female gender configuration built of durable stainless steel. PE91537 type N male to TNC female adapter operates to 18 GHz. The Pasternack RF adapter provides excellent VSWR of 1.15:1 maximum.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/ disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
