Revision History12

## **Features**

- High Power Infrared LED with surface emitting area of 10.63 mm<sup>2</sup>
- Dual-junction chip technology for maximum optical coupling in etendue-limited systems
- Common anode copper chip-on board package with high precision optical alignment features
- Low thermal resistance: 0.6°C/W junction to case
- Can be operated at variable drive currents up to 18A DC and 22.5A Pulse.
- Complements Luminus extensive CBT/CFT-90 series ranging from 405 nm to 940 nm for medical, instrumentation and industrial fiber-coupled illumination

## **Applications**

- Medical and Scientific Instrumentation
- Fiber-coupled illumination
- Inspection
- Machine Vision
- Laser source replacement for applications where light coherence is not necessary.

## **Technology Overview**

Luminus CBM-90-IRD LEDs benefit from innovations in device technology, chip packaging and thermal management. This suite of technologies give engineers and system designers the freedom to develop solutions both high in power and efficiency.

#### Reliability

Luminus CBM-90-IRD LEDs have passed a rigorous suite of environmental tests such as high-temperature operating life (HTOL), temperature cycling (TC) and humidity (WHTOL). They are fully qualified for use in a wide range of high performance and high efficacy applications.

### **REACh & RoHS Compliance**

The Luminus CBM-90-IRD LED is compliant to the Restriction of Hazardous Substances Directive or RoHS. The restricted materials including lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ether (PBDE) are not used.

# **Understanding Luminus CBM-90-IRD LED Test Specifications**

Every Luminus LED is fully tested to ensure it meets the high quality standards customers have come to expect from Luminus products.

#### **Testing Temperature**

Luminus CBM-90-IRD LEDs are tested and binned at 40°C heatsink temperature. Temperature curves are provided to allow users to scale the data for actual operating temperature conditions.

## **CBM-90-IRD Binning Structure**

 $All\,CBM-90-IRD\,LEDs\,are\,tested\,for\,radiometric\,power\,/\,peak\,wavelength\,and\,placed\,into\,one\,of\,the\,following\,flux\,/\,wavelength\,bins.$ 

#### Flux Bins<sup>1</sup>

Bin Code	Radiometric Power at 13.5A, t <sub>p</sub> =20ms		
bill Code	Minimum Flux (W)	Maximum Flux (W)	
J	7	7.75	
К	7.75	8.5	
L	8.5	9.25	
М	9.25	10	
N	10	10.75	
Р	10.75	11.5	
Q	11.5	12.25	

Note 1: Luminus maintains a  $\pm$ -6% tolerance in flux measurements.

## **Wavelength Bins**

Bin Code	Minimum Peak Wavelength (nm)	Maximum Peak Wavelength (nm)
770	770	772.5
773	772.5	775
775	775	777.5
778	777.5	780
780	780	782.5
783	782.5	785
785	785	787.5
788	787.5	790

# **Product Ordering and Shipping Part Number Nomenclature**

All CBM-90-IRD products are packaged and labeled with part numbers as outlined in below. The part number designation is as follows:

CBM - 90 - IRD - X33 - F##-##

Product Family	Chip Area	Color	Package Configuration	Bin Kit
CBM: Copper- core PCB, Multi Chip Array, AR- coated protective window	90: 9 mm²	IRD = Dual junction Infrared	X33: 28 mm x 26.75 mm - Common Anode Package See Mechanical Drawing section	See below for flux and wavelength binning information

Part Number	Minimum	Minimum	PWL range	Ordering
	Flux Bin (W)	PWL (nm)	(nm)	Part Number
CBM-90-IRD-X33	J	770	20	CBM-90-IRD-X33-J770-20

## **Optical and Electrical Characteristics**<sup>1</sup>

Parameter	Symbol	Value	Unit
Forward Current at Test	I <sub>f</sub>	13.5	А
Minimum Forward Voltage <sup>1</sup>	$V_{_{fmin}}$	3.0	V
Forward Voltage Typical	$V_{_f}$	3.6	V
Maximum Forward Voltage <sup>1</sup>	$V_{_{fmax}}$	4.0	V
Viewing Angle	2 Ø <sub>1/2</sub>	120	deg
Peak Wavelength Typical	$\lambda_{_{P}}$	780	nm
Centroid Wavelength Typical	$\lambda_{c}$	775	nm
FWHM Typical	Δλ <sub>1/2</sub>	30	nm
Temperature Coefficient of Foward voltage	TC <sub>vf</sub>	-2	mV/°C
Temperature Coefficient of Radiometric Power	TC <sub>PO</sub>	-0.45	%/°C
Temperature Coefficient of Wavelength	TC <sub>λ</sub>	0.2	nm/°C
Thermal Resistance (Electrical) <sup>2</sup>	R <sub>th (i-b)</sub>	0.45	°C/W
Emitting Area		10.63	mm²
Emitting Area Dimensions		3.3 x 3.3	mm²

Note 1: Parts are tested and binned at a current of 13.5A, 20ms single pulse and a constant heatsink temperature of  $T_{hs} = 40$ °C.

Note 2: Thermal resistance between junction to board (case).

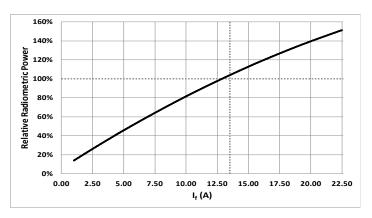

#### **Absolute Ratings<sup>2,5</sup>**

Parameter	Symbol	Rating	Unit
Absolute Minimum Current (CW or pulse) <sup>3,4</sup>		0.2	А
Absolute Maximum Current (CW) <sup>3,4</sup>		18.0	А
Reverse Voltage	VR	5	٧
Storage Temperature	Тѕтс	-40~100	°C
Maximum Junction Temperature <sup>3,4</sup>	T <sub>jmax</sub>	115 ℃	°C

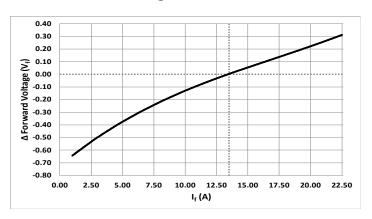

- Note 2: To prevent damage refer to operating conditions and derating curves for appropriate maximum operating conditions
- Note 3: Luminus CBM-90-IRD LEDs *are* designed for operation up to an absolute maximum forward drive current as specified above. Product lifetime data is specified at typical forward drive currents. Sustained operation at absolute maximum currents will result in a reduction of device lifetime compared to typical forward drive currents. Actual device lifetimes will also depend on junction temperature.
- Note 4: Maximum operating case temperature combined with maximum drive current defines the total maximum operating condition for the device. To prevent damage, please operate devices within specified conditions.
- Note 5: Caution must be taken not to stare at the light emitted from these LEDs. Under special circumstances, the high intensity could damage the eye.

DWG-003067 REV01

Recommended connector for Anode and Cathode:

Panduit Disco Lok™ Series P/N: DNF14-250FIB-C or JST Manufacturing Co: SPS-61T-250 for AWG 16 to 14. Panduit Disco Lok™ Series P/N: DNF10-250FIB-L or JST Manufacturing Co: SPS-91T-250 for AWG 12 to 10. (Check NEC standards for ampacity of the power cable being used.)

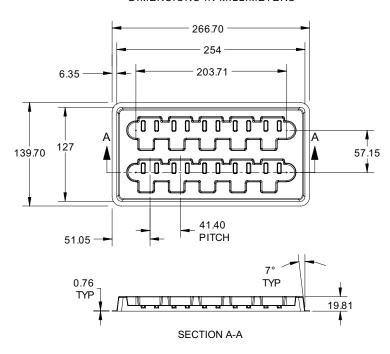

Thermistor Connector: GCT P/N WTB08-021S-F.

Recommended Female: MOLEX P/N 51146-0200 (Not recommended for new designs), GCT P/N WTB06-020H-A or equivalent.

# **Shipping Tray Outline**

#### **DIMENSIONS IN MILLIMETERS**

## Packing and Shipping Specification (CBM-90-IRD)

### **Packing Specification**

Packing Configuration	Qty /Pack	Packing Dimensions (diameter x W, mm)	Gross Weight (kg)
Stack of 5 trays with 10 devices per tray Each pack is enclosed in ESD bag	50	150 x 280 x 85	2.7

#### **Product Label Specification**

#### Label Fields (subject to change):

- 6-8 digit Box number (for Luminus internal use)
- Luminus ordering part number
- Quantity of devices in pack
- Part number revision (for Luminus internal use)
- Customer's part number (optional)
- Bin (FF-WW) as defined page 3
- 2D Bar code

Sample label –for illustration only

## **Shipping Box**

Shipping Box	Quantity	Material	Dimensions (L x W x H, mm)
Carton Box	1 -20 packs (50 - 1000 Devices)	S4651	560 x 560 x 200

## **History of Changes**

Rev	Date	Description of Change
01	10/29/2018	Preliminary Release
02	10/14/2019	Changed product name to CBM-90-IRD-780nm on pages 1 and 4 Updated PWL bins (page 3) and typical PWL and centroid values (table on page 5)
03	10/28/2019	Updated power bin following recalibration
04	05/05/2020	Updated picture on front page, ordering information on page 3, binning structure on page 4, added graphs on pages 7-8 and revised presentation drawing on page 9
05	08/10/2020	Updated temperature coefficient of radiometric power and thermal resistance on page 5
